

Weekly Distribution of Newly Reported Adverse Events After COVID-19 Vaccines By Date of Data Drop

(2/5/21 - 8/27/21)

Reporting Issues:

VAERS reports are included for data processed through the previous Friday, based on the date received by VAERS. VAERS data in WONDER are updated weekly. The data included in WONDER represent a "snap shot" of the VAERS records for reports received through the preceding Friday at a given point in time. For example, a report form is filled out on February 27th, for an event that occurred in January. VAERS receives the report on March 3rd. Due to processing time for data entry and verification, the report is entered into the electronic records on March 6th. Follow-up reports are entered into the record on March 16th. The initial report is captured in the WONDER system's "snap shot" for the next data update. However, follow-up reports do not appear in the WONDER system. The VAERS system receives continuous updates including revisions and new reports for preceding time periods. Duplicate event reports and / or reports determined to be false are removed from VAERS.

Search Results

From the 8/20/2021 release of VAERS data:

**Found 623,343 cases where Vaccine is
COVID19**

Table

 Event Outcome	 	
	Count	Percent
Death	13,627	2.19%
Permanent Disability	17,794	2.85%
Office Visit	100,965	16.2%
Emergency Room	57	0.01%
Emergency Doctor/Room	74,312	11.92%
Hospitalized	55,654	8.93%
Hospitalized, Prolonged	167	0.03%
Recovered	205,226	32.92%
Birth Defect	393	0.06%
Life Threatening	14,104	2.26%
Not Serious	258,809	41.52%
TOTAL	† 741,108	† 118.89%

† Because some cases have multiple vaccinations and symptoms, a single case can account for multiple entries in this table. This is the reason why the Total Count is greater than 623343 (the number of cases found), and the Total Percentage is greater than 100.

- 1) 50.1% or 3,018 of 6,018 reported deaths are from jabs 2/26 and older.
- 2) As of 2/26: 83.5 Million doses rolled out
- 3) As of 8/15: 358.5 Million doses rolled out
- 4) $83.5M \div 358.5M = \sim 23.29\%$
- 5) So $\frac{1}{2}$ of reported deaths come from almost $\frac{1}{4}$ doses. *Behind or throttling?*

Tot AE's:	597,140
Tot:	6,018
Result Tot:	591,122
% of Total:	1.0%
Adverse Event Count	
DEATH	6,018
Grand Total	6,018

3018 of 6018 Deaths (50.1%) are jabs 2/26 or older
